PLANT VITALISERS

RHODONO
THE ALUMINUM SULPHATE
COMPOUND

For lawns that have become excessively alkaline through the use of lime, spread Rhodono at the rate of 500 lbs. to 1,000 lbs. to the acre.

This product has been especially prepared for horticultural use in the treatment of Rhododendron Beds, to bring the soil into condition resembling that existing in the native habitat of this wonderful plant. Also for soil correction for the natural culture of all plants of the same family—Azaleas, Heaths, Kalmias, Andromedas, Clethra, Leucothoe, Oxydendron, Epigaea Repens, Vaccinium (Blueberry), Wintergreen, Huckleberry, Cranberry, Bilberry, etc., etc.

RHODONO should not be used indiscriminately but only on such plant-life as thrives in an acidified soil, as per above list.

HOW TO USE

Spread the product at the rate of 2 lbs. to each square yard of ground, or 2 tons to the acre. Distribute evenly and rake or fork in lightly. Repeat after six months and once yearly thereafter.

For Potting Soil mix very thoroughly half-pound to one pound to the cubic yard for Rhododendrons, Azaleas, Heaths, etc.

MOWRAH MEAL FOR WORM ERADICATION

Mowrah Meal, imported from India, is the most effective product for this purpose.

Directions

Outside it is used at the rate of 100 lbs. to each 200 sq. yds. of turf or soil surface. Spread in rainy weather or follow with the hose. The worms immediately come to the surface and die.

For Greenhouse use, put a little on the top of the soil of Potted Plants. Apply water and the same effect is produced.

SCOTCH SOOT. Scotch and English Gardeners were instrumental in the introduction of this product into the United States. It certainly gives intensity to color of flowers and foliage and possesses wonderful germicidal qualities, freeing the soil of slugs, grubs and cut-worms. The carbon is of high value, opening up the pores of the plants and allowing them to breathe. Gives that intense green color to a lawn and kills off soil insects.

DALLIUM
The Fertilizer for
DAHLIAS

Does not "force" the plants, but produces a natural, vigorous growth.

Ensures beautiful foliage and intensity of color in the blooms.

**YANKEE-MUM
MANURE**

It can readily be realized that YANKEE-MUM MANURE being so wonderful in the development of Chrysanthemums, is naturally a product suitable

and marvelously effective in the raising of almost all Florists' Crops, and is fast becoming known as **The Plant Food for the Grower.**

Application for Chrysanthemums

Prepare the soil for potting by mixing into each bushel of soil about $\frac{3}{4}$ lb. of YANKEE-MUM MANURE. This ensures the plants thriving from the start.

ADEQUATE FEEDING of plants for best results is a necessity and top-dressings for this purpose should be at the rate of 7 to 10 lbs. of YANKEE-MUM MANURE for each 100 square feet of bench area.

The frequency of these applications can be safely left to the grower, who is best able to judge, in accordance with the condition of his stock.

YANKEE-MUM MANURE is excellent for ALL FLORISTS' CROPS
